Project 4 hangman

By Kyle Scher

Testing Philosophy

- Testing on humans is the way to go
  - Ethical because they only get hung virtually
  - No lasting injures(except emotional)
- Let people on my dorm floor discover bugs
  - If they find a bug fix it
    - Repeat

Problems encountered

1. Word display
   a. I could not figure out a way to display the asterisks and correct letters at the same time
      i. This lead me to vectors
      ii. Vectors solved my problems, I could pass the whole thing into a function with no issues
      iii. Separate vectors for different problems

Demo
